SUPREMEPROAUDIO SPA-2400 SERIES PROFESSIONAL 2.4 GHZ True Diversity Wireless Microphone System 128-Bit SSL Encrypted Digital Transmission Automatic Frequency Agile

SPA 2.4 GHz Wireless Microphone System Components:
SPA-240 Receiver
SPA-241 Beltpack Transmitter
SPA-242 Handheld Transmitter
SPA-243 Waterproof/Submersible Combo Headset/Transmitter
SPA-157 Waterproof/Submersible Headset Microphone

Digital RF & Audio Circuits: The new SupremeProAudio 2400 Series 2.4 GHz Wireless Microphone System is truly revolutionary in design. This is the only SSL Digitally Encrypted wireless microphone system using digital circuitry for both the Audio and RF circuits in the 2.4 GHz band.

Broadcast Range: Up to 20% better broadcast range than our competitors.

Conflict-Free Operation: Operating in the worldwide approved frequency range, there will be NO CONFLICT WITH TV CHANNELS.

SSL Encrypted Digital Transmission: Because our system is 100% Digital, the transmitter and the linked receiver communicate with each other continuously...to ensure optimal frequency selection. Analog systems do not have 2-way communication. No other receiver can receive and decode the signal due to this digital encryption system.

Automatic Frequency Selection: DFHS - Digital Frequency Hopping Secure. 14 simultaneous systems may be used at once. Uses Automatic Frequency Hopping to automatically find the best frequency available in the 2.400 - 2.483 GHz frequency band. The beltpack transmitter frequency is automatically changed by the linked receiver.

Submersible Headset: The new SupremeProAudio headset transmitter is waterproof and submersible (headset plug only, not beltpack plug for beltpack systems) and easily mounts right on to SupremeProAudio's hard-use SPA-157 waterproof and submersible headset.

Operating Controls: The receiver has a built-in USB port, enabling future digital software upgrades, without replacing the receiver. Power On/Off switch; Input Sensitivity control to adjust the mic level; Mute (Audio on/off) switch and a multi-function LED that indicates when the transmitter is on and when your battery's running low. 8-10 hour battery life. Uses 2 AA NiMH batteries.

WiFi Friendly:

The SPA 2.4 GHz system is WiFi friendly and automatically avoids interfering with any WiFi networks in the area.

1 year limited warranty - 6 months on cables & connectors
