

FM Wireless Entertainment Systems

SupremeFM™ by SupremeProAudio

WIRELESS ENTERTAINMENT SYSTEMS SPAFM-300 WIRELESS FM TRANSMITTER

Easy Installation No hard wiring

The SupremeFM™ SPAFM-300 wireless transmitter (pictured right) is the latest development in FM transmitters. Easy to mount. Simple to install and operate. It connects easily to the monitor audio output on your TV, broadcasting the clearest hi-fidelity signals possible, without hard-wiring hassles. Installs in less than a minute! Note: The TV output must be Analog/ Line Level, not Digital output.

All you need is one of our wireless stereo transmitters and your member's portable radio, or one of our optional Sony FM Receivers. Clients tune in their favorite television or radio programs and say "Thank You" for providing an enjoyable exercise environment!

Each SupremeFM™ includes the transmitter, AC adapter, "Tune-To" sign and self-adhesive numbers (2 of each number).

2 year limited warranty

SPAFM300 FM Transmitter	\$295.00
SPAFMADAPT Replacement AC Adapter	\$8.95

Finding a vacant FM channel :

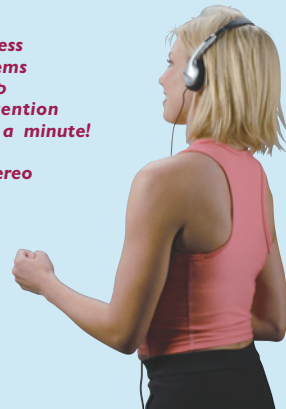

1. Go to www.Radio-Locator.com.
2. Click on **Find unused frequencies on the FM dial**.
3. Enter your **ZIP CODE** (at bottom under **Enter Your Location** and then click on **GO**).
4. **Verify Frequency:** You must tune an FM receiver to the selected channel to make certain that it is really vacant, before you broadcast on it.
5. Tune your **SupremeFM™** transmitter to one of the frequencies in the **BEST VACANT CHANNELS** column.
6. Also use the other listed **BEST VACANT CHANNELS** if you are using multiple transmitters.
