

# Small Sound Systems

## SUPREME SOUND SYSTEMS

Systems #1, #2, #3

Rack-Mounted Components

Rolling Rack (optional)

Supreme Sound System #2

These stationary and portable fitness, cycle and dance studio sound systems feature some of the most popular audio components...but are completely flexible to meet your special needs. Mix and match other components. Choose a carpeted rack (rack wheels optional) or a rolling rack with integrated wheels and retractable handle.

Systems #1, #2 & #3 include a wireless headset microphone system.

QuikLok Rack Stand raises the sound system up to bike level for cycle systems.

Speaker choices are suggested, but substitute any other speakers to suit your needs.

Remember, no dance or fitness program works unless everyone can hear both voice and music clearly!
