

Digital Signage & Nationwide Installation

Digital Signage by SupremeVision

Smarter Digital Signage Solutions

Digital signage is the next step in communications. Advertise on your own large-format LCD monitors in each facility or multiple locations within a facility. List the daily class or event schedules. Promote upcoming events. Display a weather banner or advertising from local merchants. Promote your other locations for clients who travel. There are no limits on the content. Our Creative Services Team will design a display that meets your exact needs.

SupremeVision combines the highest quality video and graphics output with easy-to-use management tools. You are in control of all content and can easily edit that content as needed. Digital signage solutions provided by **SupremeVision**. Contact us for details.

Most of the sound systems we sell are easily installed by our customers. However, some of the larger multi-zone systems are complex enough that you might want to have professional installation and set up assistance.

Since 1975, we have had a network of sound contractors across the country who are qualified to do these installations. As always, we design the system and then provide our Installation Partner with all of the information they need to correctly install our equipment in your facilities.

We coordinate, but YOU maintain full control as to layout preferences which will help your professional staff serve your clients best.

Our Installation Partners can also instruct your staff in the proper use of the equipment after installation.

Contact us for the details of this program. We trust our Installation Partners...and you will too!

“Thank you for your assistance with the recent microphone problems at Hickam Fitness Center, Hickam AFB, Hawaii. I have worked with Supreme Audio for more than 5 years while at Wiesbaden, Germany, and again here in Hawaii. Your professional and customer friendly staff makes it a pleasure to work with Supreme Audio. I appreciate your quality work with our uniformed services.”
