Save Money by never having to
replace batteries again!

Wireless Microphone Systems

Supreme Audio's The NEW BREEZE Submersible Combo Headset Mic System

You actually CAN go jump in the pool! The NEW Breeze™ lets you actually jump into the pool and then talk or instruct right from the surface of the pool. This is an exclusive from Supreme Audio!

It's taken us almost 2 years of engineering and testing to get this transmitter headset where we wanted it using the crystal clear 900 MHz frequency range. Up to 10 channels can be used simultaneously. Easy to select channels on the transmitter and the receiver with the click of a button.

You can expect the same outstanding clarity and quality you've come to know from every Supreme Audio product.

Comfortable & Easy to Wear

Tiny, Lightweight Mic Transmitter Attached Right To Your Mic. As with the original BREEZE, our "NEW Breeze" COMBO headset/transmitter mounts right on Supreme Audio's comfortable and Hard-Use™ SA159 headset. Incredibly small, The NEW Breeze™ features an easy-to-reach Power On/Off switch and channel selector button.

Built-In Rechargeable Battery

We've built in the latest Lithium Ion technology so that the battery has a life of 8 hours. When not in use, simply snap the charging module right over the mounted transmitter. Fully recharges in 3 hours. The Lithium Ion batteries have no "memory" problem so you cannot damage the battery by charging it frequently.
